

***IoPP Technical
Committee of the Year
for 11 years running***

The **Chemical Packaging Committee** (CPC) is the only industry group focused on the *packaging* aspects of chemical manufacturing. For over four decades, the CPC has been the recognized expert committee for safe and secure chemical packaging practices. Whether you are new to the industry or a veteran, your CPC membership provides the education, connections, and growth opportunities needed for global success.

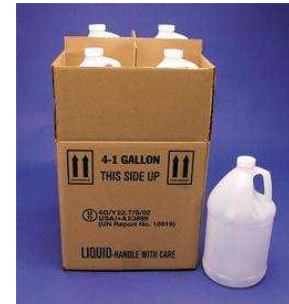

Vision:

The **CHEMICAL PACKAGING COMMITTEE** strives to be the recognized leader and resource on chemical packaging technology and regulations, and to provide a forum for resolution of industry technical issues.

Mission:

The **CHEMICAL PACKAGING COMMITTEE** provides a leadership forum, through broad and diverse representation of the chemical industry by:

- Participating proactively in regulation formulation on local, national and global levels
- Developing and distributing position papers regarding industry issues to CPC members, regulatory bodies and other interested parties
- Assuring that packaging technology and information is readily accessible for professional development of CPC members
- Embracing safe and sustainable best practices
- Ensuring swift response to trends in the industry and CPC member needs

Chemical Packaging Committee

As an expert technical committee we are focused on:

- Chemical packaging problem solving
- Professional development
- Packaging regulatory and safety concerns

Benefits of Membership:

- Access to key contacts in the chemical industry, including suppliers, packagers, and manufacturers
- Access to presentations by key contacts in regulatory agencies such as PHMSA, FRA, and EPA
- Discussion on proposed regulations related to the packaging and safe shipping of hazardous and non-hazardous chemicals
- Tours of packaging component manufacturers, packaging facilities and distribution centers
- Presentations and continuing education on:
 - site security
 - import/export container management
 - blocking and bracing techniques
 - product stewardship
 - hazardous materials training
 - new packaging technology
- Technical guidelines and evaluation of current best practices in chemical packaging

The CPC's activities are conducted in accordance with the IoPP Antitrust Policy Statement and IoPP Antitrust Rules, with which all CPC members are expected to comply.

A technical committee of the Institute of Packaging Professionals, the Chemical Packaging Committee consists of IoPP members with an interest in chemical packaging. Each member is engaged in providing services for, or in the direct manufacture of packaging and distribution of chemicals.

CPC Technical Subcommittees

- Drum, Pail and IBC
- Bag, Box and Bottle
- Regulations and Legislation
